Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 23, 2008 has been entered.

EXAMINER'S AMENDMENT

The application has been amended as follows:

The "Title" of the invention has been changed from "Apparatus and method for audio signal processing" to:

-- Apparatus and method for generating harmonics in an audio signal --

Allowable Subject Matter

Claims 1, 5-12 and 16-20 are allowed. For the purposes of allowance, the original numbering of the claims has been changed.

The following is an examiner's statement of reasons for allowance:

The general concept of generating harmonic components of a fundamental frequency to enhance the fullness of an audio signal was well known in the art at the time of the invention as evidenced by Aarts et al (US 6,111,960). Aarts also teaches the decomposition of the audio signal into frequency bands prior to the harmonic

generation of each band. However, the Examiner has not found prior art that teaches or suggests the modification of Aarts in order to provide, decomposing the audio signal such that the fundamental tone and the harmonic tone of the fundamental tone are decomposed into different frequency bands wherein the bandwidth of the frequency bands are defined based on a lowest fundamental frequency of a musical sound of the audio signal or a low interval limit, as defined in the independent claims 1, 11 and 12. Other prior art has been cited herein regarding harmonic generation of audio tones, however the other prior art of record also fails to teach or provide suggestion to arrive the combination of the elements and steps presented in the independent claims, again when said elements or steps are collectively considered in regards to each claim. For at least the reasons listed above, the dependent claims are also allowed in view of their respective dependencies upon the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Motohashi et al (US 6,845,165 B1) discloses an acoustic effect apparatus and method.

Aarts (US 6,792,119 B1) discloses an audio system with a harmonic generator.

Vierthaler (US 6,792,115 B1) discloses an apparatus for generating harmonics in an audio signal.
